

Create a New Access Key for an IAM User

1. Sign in to AWS Console

- Go to [AWS IAM Console](#)
- Sign in with an account that has permission to create and view access keys.

2. Navigate to Users

- In the IAM Dashboard, click on **Users** in the left panel.

3. Select a User

- Click on the IAM user for whom you want to generate the access keys.

4. Create Access Keys

- Go to the **Security credentials** tab.
- Scroll down to **Access keys** and click **Create access key**.
- Choose the **intended use case** (CLI, SDK, etc.) and click **Next**.
- Click **Create access key**.

5. View & Download the Keys

- Copy the **Access Key ID** and **Secret Access Key** or download the **.csv** file.
- The **Secret Access Key** is shown only once—store it securely.
